Priory Rd & Church Hill Rd – Proposed bus stop and parking improvements : Bus route 93

The London Borough of Sutton has secured Bus Priority Funding from Transport for London (TfL) to improve bus stop accessibility and bus journey times at the above location.

As you may recall, informal consultation was carried out during March 2018 in connection with the proposal to improve the bus stop/stands and parking arrangements on Priory Road and Church Hill Road.

Based on the feedback from respondents, it was necessary to review the scheme in order to address a number of specific objections to the proposals. The scheme is now modified and revisions to the proposals have subsequently been agreed with TfL, bus operators and new ward councillors and are shown on the attached plan.

The proposed scheme now includes the following measures:-

1. Alteration of kerblines and shortening of existing bus stand to clear the pedestrian crossing and private access on Priory Road
2. Conversion of existing parallel parking to diagonal parking along eastern arm of Church Hill Road.
4. Replace some of the existing parking bays with a bus layby outside 102 -120 Church Hill Road.

There will be some relocation of existing street furniture, although existing trees will be retained. Further consideration has been given to minimising the loss of on-street parking, as such, this proposal indicates an increase of one parking space in the area.

If you would like to make further comments or provide observations on the revised proposals then please send them before 31 January 2019 via our online form at the following link or send them to the address shown above:-

<https://sutton.citizenspace.com/environment/priorychurchhill>

A summary of the responses received will be presented to the local ward councillors and should it be agreed to progress the scheme, you will be notified again at that stage.

Yours sincerely,

Hitesh Wadher,
Senior Professional Engineer, Highways and Transport Team
